

MAK BLACK JAPAN

Ready-Mix Bituminous Anti-Corrosive Coating/Paint As Per IS:9862

Description

Mak Black Japan is a general purpose bituminous anticorrosive compound suitable for coating inside the water tanks, drums and other such applications. It does not have any harmful reaction with drinking water. It is lead free and resistant to acid, alkali etc. It is very effective against corrosion.

The product coating protects the surface against moisture means acting as waterproofing agent. It is having good adhesive properties to the surface.

Mak Black Japan is manufactured under strict quality control.

Packaging

The surface should be cleaned properly and be made dust free, oil and grease free. Two to Three coats can be provided. Repeated coats to be given only after the earlier coat dries completely. The surface should be cleaned properly and be made dust free, oil and grease free. Two to Three coats can be provided. Repeated coats to be given only after the earlier coat dries completely.

Packaging

1 L, 4 L & 20L Tins.
