

# MAK EMULSION

## INTRODUCTION:

Mak Emulsion–The oil in water type emulsion confirms to IS: 8887 – 1978. Latest Technology makes it ideal for road and other applications in cold state.

## RANGE:

- Rapid Setting
- Medium Setting
- Slow Setting

## THE APPLICATIONS:

### General Spray

Tack Coat

Primer Coat

Liquid Seal Coat

Penetration Macadam

Built up Spray grout

### Premix

Carpet

Macadam

Concrete

### Special Spray

Fog seal/black seal

Mulching

Dust binding

Water Proofing

### Special & Exclusive

Recycling

Patching Mixes

Slurry Seal

Soil Stabilisation

## ADVANTAGES TECHNICAL:

- Better coating ability
- More life for roads
- Less susceptible to bleeding
- Wider spreadability
- Works in dam conditions
- In built anti stripping property
- More Shelf Life

## ADVANTAGES OF USING MAK EMULSION OVER HOT BITUMEN:

Mak Emulsion in different grades and types is tailor made to meet different design and working requirements it also has certain exclusive applications where bitumen cannot be used. In addition it scores over bitumen in many ways

1. Round the year use high productivity flexibility of operation Simple and easy to handle
2. Damp aggregate can be used. Low Construction cost.
3. Pollution free
4. Conservation of Petroleum Products
5. Energy and fuel savings
6. Safe to work with.

Description	Rapid Setting	Medium Setting	Slow Setting
Surface Dressing	✓
